DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rashkes et al (Chemistry of Natural Compounds, Translation of Khimiya Prirodnikh Soedinenii, 1998, 34 (1), 48-51). Rashkes et al teach a method of treating seeds with 0.1% solution of undecaprenol. The prior art does not teach the method comprising the instant surfactants or emulsifier. The surfactants in the claims are well known to be used in the application of actives to seeds. One would have been motivated to include the surfactants of claim 4 with undecaprenol in order to enhance absorption of the active by the seed. See abstract.

Claims 1,4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wardle et al (Enhancement of root growth and alteration in cytokinin distribution in farnesol-treated barley seedlings). Wardle et al teach a method of treating roots with 10 mg L⁻¹ of farnesol. The prior art does not teach the method comprising the instant surfactants or emulsifier. The surfactants in claims are known to be used in the application of actives to seeds. One would have been motivated to include the surfactants of claim 4 with farnesol in order to enhance absorption of the active by the seed. See abstract.
